Important: FloridaNet Hosting Statewide Listening Sessions on FirstNet (National Public Safety Broadband Network/D-Block)

Posted by Brett Boston on Jan 24

FloridaNet Team: The dates for the listening session are up on the new website. My next post will include a PDF for you to share with the entire first responder community. Please encourage all first responders, decision makers, and technical operations experts to attend the listening sessions. There is no charge. Registration in advance will be greatly appreciated.

Those of you with membership databases, we would greatly appreciate it if you would share the forthcoming PDF and the link below.

Michael Myers

Just a suggestion about the online format, having done a few of these types of webinar sessions, it would be wise to setup a panel with a host to discuss topics and take questions. Just a thought.

We plan to have a panel of FloridaNet regulars, when and if they are available at the session.
